

# THE IMPORTANCE OF *Water Softeners*

ALMOST ALL WATER IN THE U.S.  
**STARTS OUT AS  
HARD WATER!**

Hard water is formed when it is contaminated with dissolved minerals like calcium, magnesium, sulfur, iron and lead during the natural water cycle.

## Effects of Hard Water on You and Your Home

Stained Sinks and Tubs

Spots on Dishes

Clogged Pipes

Dry, Brittle or Stained Hair

## How Will a Water Softener Help?

Water softeners will eliminate calcium and magnesium in water extending the life of:

Water Heaters

Washing Machines

Coffee Makers

Humidifiers

Plumbing Systems

**BY AT LEAST  
30%**

A water softener will also reduce the amount of soap you will need by

**70%** ↓

## Save Money On:

Appliances

Repairs

Cleaning Products
